MEET THE CEO

Michael is a fisherman and ardent mechatronic engineer, he earned his doctorate in the field of robotic and control engineering.

He has published several papers, registered patents, received the Thales UAS Innovation Award in 2010, and was finalist in the Sikorsky entrepreneurial challenge.

Prior to NM Robotic he was co-founder of several startups in field of mobile robotics and sensor systems.

In 2013 he decided to start something new and founded NM Robotic.

OUR MISSION

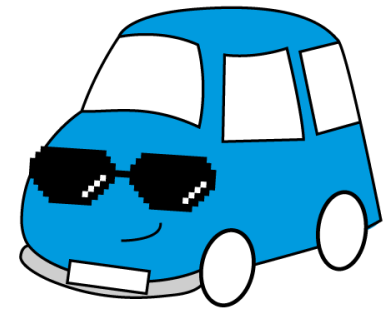

We believe in a future where a car is a friend you can count on – our product will support you to feel comfortable while driving. Ddrive is based on a do-it-yourself installation concept and a do-it-together sourcing concept.

We see it as part of our mission to help drivers to:

- Keep themselves and their passengers safe
- Save precious time
- Be more sustainable and save money
- Avoid unnecessary damage and repairs

OUR PRODUCT

Drive is the world's first app which is aimed at making you and your car a better team.

We offer a package of smartphone apps and easily installed devices to watch over the condition of your car, and react in advance. Our solutions will help to improve your driving ability and make your car a friend you can count on.

Drive will support you to:

- Find your car in the parking lot
- Recommend a parking spot close to your destination
- Avoid collision while parking or driving
- Find the cheapest gas station when your tank is nearly empty
- and... much much more!

Our combination of solutions will make your life much easier, and the time you spend in your car more comfortable.
